

Host Plants of the Carpenter Bee, *Xylocopa brasiliensis* L. (Hymenoptera: Apoidea) in Puerto Rico¹

George C. Jackson and Roy O. Woodbury²

ABSTRACT

The host plants of the carpenter bee, *cigarrón*, *Xylocopa brasiliensis* L., whose flowers supply adult foods, nectar, and pollen, and whose woods are used as nesting sites are reported. More than ten years of observations and accumulated notes indicate that more than 284 dicotyledonous and one monocotyledonous species (male bamboo, *Dendrocalamus strictus* (Roxb.) Nees) are used for food. Of these 285 plants, 277 are reported for the first time for Puerto Rico. Thirteen species are used as nesting sites, with eight being first reports also. It is suggested that the carpenter bee inadvertently, directly or indirectly may be responsible for the pollination of 25 fruit and seed crops that are used as food by man in Puerto Rico.

INTRODUCTION

The purpose of this paper is to present some observations made on the biology of the carpenter bee, *cigarrón*, *Xylocopa brasiliensis* L. (Fig. 1) in Puerto Rico. It is hoped that this report on the host plants that serve as nesting sites and their flowers which provide adult food (nectar and pollen) will add to our knowledge of the habits of our single species of this widespread genus. It is also hoped that these additional data will stimulate research on this insect in the Caribbean Basin.

Dr. Agustín Stahl (20), is credited with the first reporting of Xylocopidae in Puerto Rico. In his collection of insular fauna, there were two specimens of *X. morio* Fab., one male (Cat. No. 58-97) and one female (Cat. No. 82-99). Gundlach (4) observed that the carpenter bee is very common in Puerto Rico, as it is in Cuba. He also noted the color differentiation between males (yellow) and females (black), and mentioned their wood nesting habits. Wolcott (21) lists the Puerto Rico species as *X. brasiliensis* L., based on determinations by S. A. Rhower, indicating that *X. morio* Fab. and *X. aenipennis* L. are synonyms to *X. brasiliensis* L. He further reports adults nesting in dead trunks of

¹ Manuscript submitted to the Editorial Board, October 2, 1975. Parts of this paper were presented at the Annual Meeting of the Sociedad Puertorriqueña de Ciencias Agrícolas, Mayagüez Institute of Tropical Agriculture, Mayagüez, P.R. October 17, 1975.

² Associate Horticulturist and Plant Taxonomist, Agricultural Experiment Station, respectively, Mayagüez Campus, University of Puerto Rico, Río Piedras, P.R.

hibiscus, *Hibiscus* sp. at Río Piedras (24), and in fence posts at five different geographic locations (21, 22). Martorell (16) relates on those insects nesting in dead trunks and branches of the tall albizia, *Albizia procera* (Willd.) Benth., *Ficus trigonata* L. (*F. stahlii* Warb.) and West Indian mahogany, *Swietenia mahagoni* Jacq. in Puerto Rico. Wolcott (23, 24) and Ramos (19) report that this insect is abundant on Mona Island, and that they nest in *Ficus trigonata* L. (19) there. *X. brasilianorum* L. frequents many kinds of flowers (16, 24), and has been described specifically on *Lantana* sp.; sunflower, *Helianthus annuus* L. at Vega Alta and hibiscus, *Hibiscus* sp. at Río Piedras by Wolcott (22, 23, 24).

The first report from Puerto Rico suggesting the pollinating activity of *X. brasilianorum* L. was made by Martin et al. (15), working with Mexican species of *Dioscorea*. Jackson and Bauzá (5) demonstrated that the carpenter bee is a pollinator of the tropical nut, *Lecythis elliptica* Kunth. Barnés and Freyre (1) stated that this insect pollinates *Tephrosia vogelii* Hook. f.

MATERIALS AND METHODS

This study was started before January 1964, as an accumulative list. From the start, carpenter bees have been observed at all seasons of the year and in practically all of our geoclimatological regions.

Flowering plants utilized by this insect as a food source have been noted as to genera, species, and location, only after absolute certainty of food collecting activity had been made. Common English (2, 7, 11, 12) and/or Spanish plant names (2, 11, 12, 18), when known, have been included. Location of the first observed feeding site is also listed. The taxonomic nomenclature of Britton and Wilson (2), as revised by Liogier (9, 10) is used.

Nests were not collected but only recorded as to genera and species of plant material, after their occupation by the carpenter bee was positive.

RESULTS

GRAMINEA: BACIFFERAЕ

Dendrocalamus strictus (Roxb.) Nees.

Myinwa flower, male bamboo, bambú, at Río Piedras.

PALMAЕ

Caryota mitis Lour.

Tufted fish-tail-palm, at Santurce.

Coccothrinax alta Beccari.

(*C. argentea* Lodd.) (Sargent), Puerto Rican silver-palm, palma plateada, at Florida.

Cocos nucifera L.

Coconut palm, palma de coco, at Santurce.

Chrysalidocarpus lutescens Wendl.

Yellow butterfly-palm, palma dorada, areca, at Santurce.

Gaussia attenuata (Cook) Beccari.

Puerto Rican Llume-palm, llume, at Vega Baja.

Hyophorbe verschaffeltii Wendl.

Spindle-palm, at Río Piedras.

Livistonia chinensis R. Br.

Chinese-fan-palm, palma de borbón, at Río Piedras.

Phoenix canariensis Chabaud.

Canary Island date palm, dátil, at Río Piedras.

P. dactylifera L.

Date palm, dátil, at Ponce.

P. reclinata Jacq.

Cluster date palm, dátil, at Río Piedras.

P. roebelinii O'Brien.

Dwarf date palm, dátil, at Río Piedras.

Prestoea montana (R. Grah.) Nichols.

(*Euterpe globosa* Gaertn.), Mountain-palm, palma de sierra, at Toro Negro Mts.

Pritchardia pacifica Seem & Wendl.

Fiji Island fan-palm, palma de jardín, at Santurce.

P. thurstonii.

Thurstons pritchard-palm, at Santurce.

Roystonea borinquena O. F. Cook.

Royal-palm, palma real, at Fortuna.

R. regia (Kunth) O. F. Cook.

Cuban royal-palm, palma real cubana, at Río Piedras.

Sabal causiarum (Cook) Beccari.

Puerto Rican hat-palm, palma de sombrero, at Isabela.

Thrinax microcarpa Sarg.

Broom-palm, palma de escoba, at Ponce.

Washingtonia robusta Wendl.

Washington-palm, palma del desierto, at Río Piedras.

AMARYLLIDACEAE

Agave missionum Trel.

Century-plant, corita, at Juana Diaz.

A. sisalana Perrine.

Sisal agave, maguey, at Guánica.

Aloe vulgaris Lam.

Mediterranean aloe, sábila, at La Paraguera.

Furcraea tuberosa Ait. f.

Maguey criollo, female karata, at Salinas.

Hymenocallis americana Roem.

Lirio blanco, American hymenocallis, at Dorado.

Sansevieria laurentii

Congo snake, sansevieria, at Río Piedras.

Smilax coriacea Spreng.

Green-brier, bejuco de membrillo, at Tortugero.

DIOSCOREACEAE

Dioscorea composita Hemsl. (15)

Dioscorea, at Mayagüez.

D. floribunda Mart. & Gal. (15)

Dioscorea, at Mayagüez.

D. spiculiflora Hemsl. (15)

Dioscorea, at Mayagüez.

HAEMODORACEAE

Xiphidium coeruleum Aubl.

Mano de mono, at Río Piedras.

ZINGIBERACEAE

Alpinia speciosa (Wendl.) K. Schum.

(*Languas speciosa* Small), Shell-flower, boca de dragón, at Corozal.

Costus macrostrobilus K. Schum.

Spiral-flag costus, caña india, at Luquillo mountains.

Hedychium coronarium Koenig.

Common ginger-lily, nardo, at Luquillo mountains.

Renealmia aromatica (Aubl.) Griseb.

(*Alpinia aromatica* Aubl.), Aromatic galangal, bihao, at El Verde.

R. exaltata L. f.

(*Alpinia exaltata* R. & S.), Jengibre de jardín, at Bayamón.

Thalia geniculata L.

Thalia, pámpano, at Arecibo.

ORCHIDACEAE

Epidendrum ciliare L.

(*Auliza ciliaris* Salisb.), Birds-in-flight, dama de noche, at Guaynabo.

Vanda ("Miss Agnes Joaquim" **Hookeriana** Reichb.f. x *V. teres* Lindl.

Vanda, orquídea vanda, at Guaynabo.

POLYGONACEAE

Antigonon leptopus Hook. & Arn.

Mountainrose coral-vine, coralina, at Isabela.

A. guatemalense Meisn.

(*A. macrocarpon* Britt. & Wil.), white coral-vine, coralina blanca, at Río Piedras.

Coccoloba costata Wr. × Sauv.

(*Coccolobis rupicola* Urban), at Vega Baja.

C. diversifolia Jacq.

(*Coccolobis laurifolia* Jacq.), Mixleaf seagrape, uvilla, at Bayamón.

C. Krugii Lindau.

Krug's seagrape, at Guánica.

C. microstachya Willd.

(*Coccolobis obtusifolia* Jacq.), Puckhout, uvillo, at Guánica.

C. pirifolia Desf.

At Florida.

C. pubescens L.

(*Coccolobis grandifolia* Jacq.), Grandleaf seagrape, moralón, at Florida.

C. rugosa Desf.

Ortegón, at Guayanés.

C. Sintenisii Urban.

Uvero de monte, at Susúa forest.

C. swartzii Meisn.f. *urbaniana* (Lindl.) Howard.

(*Coccolobis borinquensis* Britt.), Ortegón, at Carite.

C. uvifera (L.) Jacq.

Common seagrape, uva de mar, at Santurce.

C. venosa L.

Chiggery-grape, calambreña, at Fajardo.

Triplaris caracasana Cham.

Ant-tree, triplaris, at Río Piedras.

NYCTAGINACEAE

Boerhaavia scandens L.

Pega-pollo, at Guánica.

Bougainvillea spectabilis Willd.

Brazil bougainvilla, trinitaria, at Ponce.

Guapira discolor (Spreng.) Little.

Barrehorno, at Desecho.

G. fragrans (Dum.-Cours.)

Black mampoo, corcho, at Guayama.

Mirabilis jalapa L.

Common four o'clock, siciliana, at Mayagüez.

Pisonia aculeata L.

Devil's-claw pisonia, escambrón, at Bayamón.

P. albida (Heimerl.) Britton.

Loblolly, palo bobo, at Guánica.

P. helleri Standley.

Hold-me-back, escambrón, at Sabana Hoyos.

P. subcordata Sw.

Loblolly, palo bobo, at Ramsey.

BASELLACEAE

Anredera leptostachys (Moq.) Steen.

(*Boussingaultia leptostachys* Moq.), Madeira-vine, suelda-con-suelda, at Guayama.

MENISPERMACEAE

Cissampelos pareira L.

Velvet-leaf, bejuco de mono, at Ft. Buchanan.

MAGNOLIACEAE

Magnolia grandiflora L.

Southern magnolia, magnolia, at Adjuntas.

M. portoricensis Bello.

Puerto Rican magnolia, jagüilla, at Mt. Guilarte.

M. splendens Urban.

Magnolia, laurel sabino, at Luquillo Mts.

LAURACEAE

Cinnamomum elongatum (Vahl.) Kosterm.

(*Phoebe elongata* (Vahl.) Nees), Avispillo, at Río Piedras.

Licaria brittoniana Allen & Gregory.

Canela, at Maricao.

Ocotea floribunda (Sw.) Mez.

Ocotea, laurel, at Dorado.

Nectandra antillana Meisson.

Bedstead-wood, aguacatillo, at Dorado.

N. coriaceae (Sw.) Griseb.

Lance-wood, cigua, at Quebradillas.

N. Krugii Mez.

Laurel canelón, at Guavate forest.

N. patens (Sw.) Griseb.

Laurel roseta, at Florida.

Persea americana Mill.

(*P. persea* Cockrell), Avocado, aguacate, at Juana Díaz.

BRASSICACEAE

Brassica integrifolia (West) O. E. Schultz.

Wild mustard, mostaza, at Cayey.

CAPPARIDACEAE

Capparis cynophallophora L.

Jamaica caper, bejuco inglés, at Coamo.

C. flexuosa L.

Dog caper-tree, palo de burro, at Guánica.

C. indica (L.) Fawc. & Rendle.

Liguam, at Fajardo.

Cleome spinosa Jacq.

Spiny spider-flower, flor de perro, at Salinas.

MORINGACEAE

Moringa oleifera Lam.

(*M. moringa* Millsp.), Horseradish-tree, ángela, at Salinas.

CRASSULACEAE

Bryophyllum pinnatum (Lam.) Kurz.

Air-plant, bruja, at Tortuguero.

AMYGDALACEAE

Chrysobalanus Icaco L.

Coco-plum, hicaco, icaco, at Tortuguero.

LEGUMINOSAE: MIMOSOIDEAE

Acacia farnesiana (L.) Willd.

(*Vachellia farnesiana* Wight & Arn.), Sweet-acacia, aroma, at Fajardo.

A. tortuosa (L.) Willd.

Twisted-acacia, aroma, at Cayo Muertos.

Albiza lebbeck (L.) Benth.

(*Albizia lebbeck* (L.) Benth.), Woman's tongue, acacia amarilla, at Quebradillas.

Callinandra caracasana (Jacq.) Benth.

(*Annesila portoricensis* Britt.), white anneslia, cojobillo, at Hato Rey.

Inga fagifolia (L.) Willd.

(*I. laurina* (Willd.), pomshock, guamá, at Cayey.

I. vera Willd.

(*I. inga* Britt.), guaba-inga, guaba, at Cayey.

Pithecellobium dulce (Roxb.) Benth.

P. Saman (Willd.) Benth.

Guamachil ape's-earring, guamá Americano, at Río Piedras.

Raintree-saman, samán, at Río Piedras.

P. unguis-cati (L.) Benth.

Black-bead, uña de gato, at Guánica.

Prosopis juliflora (Sw.) D.C.

Mesquite, bayahonda, at La Parguera.

LEGUMINOSAE: CAESALPINOIDEA

Caesalpinia crista L.

(*Guilandia crista* (L.) Small), Gray nickers, mata de playa, at San Juan.

C. divergens Urban.

(*Guilandia divergens* (Urb.) Britt.), Small yellow nickers, mata de playa, at Luquillo Beach.

C. pulcherrima (L.) Sw.

(*Poinciana pulcherrima* L.), Barbados pride, clavellina, at Santurce.

Cassia aeschynomene DC.

(*Chamaecrista aeschynomene* Greene), Partridge-pea, at Río Piedras.

C. antilliana (Britt. & Rose) Alain.

(*Chamaecrista antilliana* Britt. & Rose), Hediondilla, at Cayey.

C. bicapsularis L.

(*Adipera bicapsularis* (Britt. & Rose), Christmas-bush, hoja de sen, at Farjado.

C. fistula L.

Golden shower senna, caña fistula, at Aguirre.

C. javanica L.

(*C. nodosa* Hamilt.), Appleblossom senna, cassia rosada, at Río Piedras.

C. polypylla Jacq.

(*Peiranisia polypylla* (Jacq.) Britt. & Rose), Retama prieta, at Salinas.

C. stahlii Urban.

(*Adiptera sthalii* Britt. & Rose), Stahl's cassia, vela muerto, at Cayey.

Delonix regia (Bojer) Raf.

Royal poinciana, flamboyán, at Cayey.

Haematoxylon campechianum L.

Logwood, campeche, at Río Piedras.

Hymenaea courbaril L.

West Indian locust, algarrobo, at Río Piedras.

Peltophorum inerme (Roxb.) Naves.

(*P. ferrugineum* (Dene.) Benth.), Yellow flamboyant, flamboyán amarillo, at Luquillo forest.

Poinciana gillesii Hook.

Paradise poinciana, at Santurce.

Tamarindus indica L.

Tamarind, tamarindo, at Jauca.

LEGUMINOSAE: FABOIDEA

Cajanus cajan (L.) Millsp. (3).

(*Cajan cajan* Millsp.), Pigeon-pea, gandur, at Mayagüez.

Calopogonium coeruleum Benth.

Jicama, at Río Piedras.

Canavalia ensiformis (Jacq.) DC.

Sword-bean, haba de burro, at Río Piedras.

C. gladiata DC.

Horse-bean, at Río Piedras.

C. maritima (Aubl.) DC.

Bay-bean, haba de playa, at Rincón.

Centrosema plumieri (Turp.) Benth.

(*Bradburya plumieri* Kuntze), Butterfly-pea, conchita, at Río Piedras.

C. pubescens Benth.

(*Bradburya pubescens* Kuntze), Butterfly-pea, conchita, at Río Piedras.

C. virginianum Benth.

(*Bradburya virginianum* Kuntze), Butterfly-pea, conchita de Virginia, at Guaynabo.

Clitoria laurifolia Poir.

(*Martiusia laurifolia* Britt.), Pigeon-wings, conchita, at Tortuguero.

C. rubiginosa Juss.

(*Martiusia rubiginosa* Britt.), Pigeon-wings, conchita, at Dorado.

Crotalaria latifolia L.

Rattle-box, matraca, at Coamo.

C. retusa L.

Yellow lupin, matraca, at Aguirre.

C. saltiana Andr.

(*C. striata* DC.), Rattle-box, matraca, at Dorado.

C. verrucosa L.

Blue rattle-box, matraca, at Vacía Talega.

Dalbergia ecastaphyllum (L.) Taub.

(*Ecastophyllum ecastophyllum* Britt.), Coin-vine, palo de pollo, at Dorado.

D. monetaria l. f.

(*Securidaca volubilis* L.), Money-bush, membrillo, at Sabana Hoyos.

Erythrina eggersii Krug, & Mold.

(*E. horrida* Eggers), Cock's-spur-coral-bean, espuela de gallo, at Río Piedras.

E. variegata L. 'occidentalis' (L.) Merrill.

Variegated coral-bean, bucayo haitiano, at Santurce.

Gliricidia sepium (Jacq.) Kunth ex Walp.

Madre de cacao, at Río Piedras.

Goeffrea inermis W. Wright.

(*Andria inermis* H.B.K.), Bastard-mahogany, moca, at Cayey.

Lablab niger Medic.

(*Dolichos lablab* L.), Lablab-bean, chícharos, at Tortuguero.

Machaerium lunatum (L.F.) Ducke

(*Drepanocarpus lunatus* (L.F.) G.F.W. Meyer), Escambrón, at Humacao beach.

***Macroptilium lathyroides* (L.) Urban.**

(*Phaseolus lathyroides* L.), Wild bush-bean, habichuela parada, at Luquillo beach.

***Mucuna solanei* Fawc. & Rendle.**

Sea-bean, ojo de buey, at Dorado.

***Phaseolus adenanthus* G.F.W. Meyer.**

Wild-bean, habichuela cimarrona, at Guaynabo.

***P. vulgaris* L. 'Contender'.**

Snap-bean, habichuela tierna, at Isabela.

***Pitetia aculeata* (Vahl.) Urban.**

Fustic, tachuelo, at Coamo.

***Pterocarpus indicus* Willd.**

India padunk, oreja de mono, lluvia de oro, at Río Piedras.

***P. officinalis* Jacq.**

Swamp-bloodwood, palo de pollo, at Humacao.

***Sabinea florida* (Vahl.) DC.**

Wattapama, retama, at Río Abajo forest.

***Sesbania grandiflora* (L.) Pers.**

(*Agati grandiflora* Desv.), Agati sesbania, gallito, at Guánica.

***Tephrosia vogelii* Hook. F. (1).**

Vogel tephrosia, tefrosia, at Mayagüez.

***Vigna luteola* (Jacq.) Benth.**

(*V. repens* (L.) Kuntze), Cow-pea, at Guaynabo.

***V. vexillata* (L.) A. Rich.**

Cow-pea, frijol cimarrón, at Guaynabo.

ZYGOPHYLLACEAE

***Guaiacum officinale* L.**

Common lignum-vitae, guayacán, at San Juan.

***G. sanctum* L.**

Hollywood lignum-vitae, guayacán blanco, at Guánica.

MALPIGHIACEAE

***Brachypteris ovata* (Cav.) Small.**

At Humacao.

***Bunchosia glandulosa* (Cav.) DC.**

Café forastero, at Florida.

***Byrsonima coriacea* Millsp.**

Maricao, at Tortuguero.

***B. lucida* (Sw.) DC.**

(*B. cuneata* P. Wil.), Locust-berry, palo de doncella, at Sabana Grande.

Malpighia glabra L.

Barbados-cherry, cereza, at Aguadilla.

M. punicifolia L.

West Indian-cherry, acerola, at Juana Díaz.

M. shaferi Britt. & Wilson.

Olaga, at Maunabo.

Stigmaphyllon periplocifolium (Desf.) Juss.

(*S. lingulatum* Small), Amazon-vine, bejuco de San Pedro, at Santa Isabel.

S. tomentosum (Desf.) Ndz.

Amazon-vine, bejuco de toro, at Coamo.

RUTACEAE

Citrus medica L.

Citron, cidra, at Adjuntas.

Murrya exotica L.

(*Chalcas exotica* (L.) Millsp.), Orange jesamine, café de la India, at Fortuna.

BURSERACEAE

Bursera simaruba (L.) Sarg.

(*Elaphrium simaruba* (L.) Rose), West Indian-birch, gumbolimbo, at Coamo.

MELIACEAE

Melia azedarach L.

China-berry, lilaila, at Río Piedras.

POLYGALACEAE

Polygala cowellii (Britt.) Blake.

(*Phlebotaenia cowellii* Britt.), Violet-tree, violeta, at Coamo.

EUPHORBIACEAE

Aleurites moluccana (L.) Willd.

Candle-nut, nuez de la India, at Florida.

Croton discolor, Willd.

Lechecillo, at Guánica.

C. lucidus L.

Fire-bush, at Guánica.

C. rigidus (Muell. Arg.) Britton.

Yellow balsam, adormida, at Quebradillas.

Euphorbia pulcherrima Willd.

Poinsettia, flor de pascua, at Aibonito.

***Hura crepitans* L.**

Sand-box, javilla, at Río Grande.

(*Adenoropium hastatum* (Jacq.) Britt. & Wilson), Peregrina nettle-spurge, peregrina, at Santurce.

***Pedilanthus tithymaloides* (L.) Poit.**

Slipper-plant, ipecacuana, at Santurce.

***Ricinus communis* L.**

Castor-oil plant, higuereta, at Vacía Talega.

ANACARDIACEAE

***Anacardium occidentale* L.**

Cashew-nut, cajuil, pajuil, at Tortuguero.

***Schinus terebinthifolius* Raddi.**

Christmas-berry-tree, pimienta del Brasil, at Florida.

CELASTRACEAE

***Cassine xylocarpa* Vent.**

(*Elaeodendron xylocarpum* DC.), Marble-tree, coscorrón, at Vacía Talega.

HIPPOCRATEACEAE

***Hippocratea volubilis* L.**

Bejucos prietos, at Sabana Hoyos.

***Pristimera caribaea* (Urb.) A.C.Sm.**

(*Hippocratea caribaea* Urb.), at Sabana Hoyos.

DODONAEACEAE

***Dodonaea viscosa* Jacq.**

(*D. ehrenbergii* Schl.), Varnish-leaf, chamiso, at Vacía Talega.

SAPINDACEAE

***Serjania polyphylla* (L.) Radlk.**

Basket-wood, bejucos de costilla, at Vacía Talega.

RHAMNACEAE

***Colubrina arborescens* (Mill.) Sarg.**

(*C. colubrina* Millsp.), Soap-tree, abejuelo, at Vacía Talega.

***Gouania lupuloides* (L.) Urban.**

Chew-stick, bejucos de sopla, at Vacía Talega.

***Ziziphus jujuba* (L.) Lam.**

Jujube, aprín, at Fajardo.

Z. reticulatus (Vahl.) DC.

(Sarcomphalus reticulatus (Vahl.) Urb.), Espejuelo, at Guánica.

MALVACEAE

Abelmoschus esculentus (L.) Moench.

Okra, quimbombó, at Santa Isabel.

Hibiscus (L.) spp. (15).

Hibiscus, pavona, at Río Piedras.

H. bifurcatus Cav.

Fork-leaf hibiscus, buenas tardes, at Tortuguero.

H. forcillatus Lam.

At tortuguero.

H. rosa-sinensis L.

Chinese hibiscus, amapola, at Fortuna.

H. trilobus Aubl. Pl.

At Tortuguero.

H. sabdariffa L.

Jamaica-sorrel, viña, at Santurce.

H. schizopetalus (Mart.) Hook.

Fringed-hibiscus, lira, at Santurce.

Malache spinifex (L.) Kuntze.

Barb-fruit pavonia, cadillo espinoso, at Quebradillas.

Malachra alceaefolia Jacq.

Bastard-okra, malva de caballo, at Santurce.

STERCULIACEAE

Helicteres jamaicensis Jacq.

Cow-bush, huevo de gato, at Tortuguero.

Melochia tomentosa L.

(Moluchia tomentosa (L.) Britt.), Broom-wood, bretónica afelpada, at Santa Isabel.

Melochia villosa (Mill.) Fawc. & Rendle.

(Riedlea hirsuta DC.), Bretónica peluda, at Tortuguero.

OCHNACEAE

Ochna multiflora DC.

Ochna, at Guaynabo.

Oratea littoralis Urban.

Abeyuelo, at Tortuguero.

GUTTIFERAE

Garcinia dulcis (Roxb.) Kurz.

Mangosteen, mangostán, at Río Piedras.

G. tinctoria (DC.) Dunn.

Garcinia, mangostín, at Río Piedras.

Mammea americana L.

Mammy-apple, mamey, at Maunabo.

FLACOURTIACEAE

Casearia decandra Jacq.

Wild-honey-tree, gía verde, at Río Piedras.

Homalium racemosum Jacq.

Caracolillo, at Monte del Estado.

PASSIFLORACEAE

Passiflora foetida L.

Love-in-the-mist, tagua-tagua, at Santa Isabel.

P. laurifolia L.

Yellow-granadilla, parcha, at Guaynabo.

CACTACEAE

Consolea rubescens (Salm-Dyck. ex DC.) Lam.

(*Opuntia rubescens* (Salm-Dyck), Prickly-pear, tuna de yagua, at Guánica.

Hylocereus trigonus (Haw). Stafford.

Night-blooming cereus, pitajaya, at Dorado.

Lamaireocereus hystrix (Haw.) Britt. & Rose.

Spanish-dildo, dildo español, at Guánica.

Opuntia dillenii (Ker-Gawl) Haw.

Dillen prickly-pear, tuna brava, at Guánica.

Pilosocereus royenii (L.) Byles & Rowley.

(*Cephalocereus royenii* (L.) Britt. & Rose), Royen pilocereus, sebucán, at Guánica.

LYTHRACEAE

Cuphea platycentra Lem.

(*Parsonsia platycentra* (Lem.) Britt.), Cigar-flower, chiagari, at Guaynabo.

Lawsonia inermis L.

Henna-plant, resedá, at Dorado.

PUNICACEAE

Punica granatum L.

Pomegranate, granada, at Salinas.

LECYTHIDACEAE

Couroupita guianensis Aubl.

Cannon-ball tree, bala de cañón, at Río Piedras.

Lecythis elliptica Kunth (5).

Monkey-pot, nuez de paraíso, at Juana Díaz.

COMBRETACEAE

Buchenavia capitata (Vahl.) Eichl.

Granadillo, at Tortuguero.

Terminalia catappa L.

Indian-almond, almendrán, at Isla Verde.

Laguncularia racemosa (L.) Gaertn.

White-mangrove, mangle blanco, at Aguirre.

MYRTACEAE

Eugenia jambos (L.) Millsp.

Rose-apple, pomarrosa, at Tortuguero.

E. malaccensis L.

Malay-apple, manzana malaya, at Río Piedras.

Psidium guajava L.

Guava, guayaba, at Juana Díaz.

EBENACEAE

Diospyros philippensis (Desr.) Guercke.(D. *discolor* Willd.), Velvet-peach, mabolo, at Río Piedras.

SYMPLOCACACEAE

Symplocos martinicensis Jacq.

Martinique sweet-leaf, aceituna blanca, at Tortuguero.

OLEACEAE

Syringa vulgaris L.

Common lilac, at Guayama.

APOCYNACEAE

Nerium oleander L.

Oleander, adelfa, at Guaynabo.

Vinca rosea L.

Madagascar periwinkle, playera, at Aguirre.

CONVOLVULACEAE

Ipomoea batatas (L.) L. (3).

Sweet-potato, batata, at Mayagüez.

I. carnea Jacq.

Morning-glory, batatilla carnosa, at Salinas.

I. cathartica Poir.

Morning-glory, bejuco de gloria, at Tortuguero.

I. crassicaulis (Benth.) Robinson.

Aguinaldo morado, at Pastillo.

I. pes-caprae (L.) Roth.

Soil-bind morning-glory, bejuco de playa, at Vacía Talega.

I. quamoclit L.

(*Quamoclit quamoclit* Britt.), Cypress-vine, cambustera, at Isabela.

I. rubra (Vahl.) Millsp.

Morning-glory, bejuco de puerco, at Tortuguero.

I. stolonifera (Cyrill) Poir.

Beach morning-glory, bejuco de costa, at Salinas.

I. tiliacea (Willd.) Choisy.

Morning-glory, bejuco de puerco, at Tortuguero.

Merremia dissecta (Jacq.) Hall f.

(*Ipomoea dissecta* Pursh), Noyau-vine, noyo, at Tortuguero.

Porana paniculata Roxb.

Christmas-vine, coralita blanca, velo de novia, at Río Piedras.

Stictocardia campanulata (L.) Millsp.

Morning-glory, at Manatí.

Turbina corymbosa (L.) Raf.

Christmas-vine, aguinaldo, at Santurce.

VERBENACEAE

Citharexylum fruticosum L.

Fiddle-wood, péndula, at Tortuguero.

Clerodendrum aculeatum (L.) Schlect.

(*Volkameria aculeata* L.), Prickly-myrtle, escambrón blanco, at Vacía Talega.

Duranta repens L.

Golden-dew drop, lila, at Río Piedras.

Latana spp. (22).**Lantana odorata** L.

Button-sage, Santa María, at Santurce.

Tectona grandis L. F.

Teak, teca, at Río Piedras.

Vitex angus-castus L.

Chaste-tree, suazgatillo, at Río Piedras.

LABIATAE

Coleus Blumei Benth.

Common coleus, vergüenza, at Carolina.

***Hyptis atrorubens* Poit.**

Bush-mint, marrubio, at Dorado.

***H. capitata* Jacq.**

Wild-hops, marrubio obscuro, at Dorado.

***H. lantanifolia* Poit.**

Bush-mint, marrubia blanco, at Dorado.

***Leonotis nepetaefolia* (L.) R.Br.**

Lion's-ear, molinillo, at Río Piedras.

***Leonurus sibiricus* L.**

Lion's-tail, agripalma, at Río Piedras.

***Ocimum basilicum* L.**

Sweet-basil, albahaca, at Santa Isabel.

***O. sanctum* L.**

Mosquito-plant, albahaca, at Manatí.

SOLANACEAE

***Brunsfelsia americana* L.**

Franciscan rain-tree, aguacero, at Guayama.

***B. undulata* Sw.**

Lady-of-the-night, alelí, at Santurce.

***Dunalia arborescens* (L.) Sleumer.**

Galán arbóreo, at Cayey.

***Lycopersicon esculentum* Millsp. 'Manapal'.**

Tomato, tomate, at Río Grande.

***Nicotiana tabacum* L.**

Tobacco, tabaco, at Guayama.

***Solandra grandiflora* Sw.**

(*Swartzia grandiflora* Gmel.), Swartz-pea, bejuco de pedro, at Santurce.

***Solanum melongena* L.**

Eggplant, berejena, at Santa Isabel.

***S. seaforthianum* Andr.**

False-belladonna, jazmín de Italia, at Guaynabo.

***S. wendlandii* Hook. F.**

Costa Rican nightshade, campana de pascua, at Guayama.

SCROPHULARIACEAE

***Agalinis fasciculata* (Ell.) Raf.**

Gerardia, yerba verónica, at Tortuguero.

BIGNONIACEAE

***Cydista aequinoctialis* (L.) Miers.**

Guard-withe, bejuco blanco, at Dorado.

***Distictis lactiflora* (Vahl.) DC.**

Vanilla-distictis, liana fragante, at Salinas.

***Doxantha unguis-cati* (L.) Rehder.**

(*Batocydia ungis* (L.) Mart.), Cat-claw, pega palo, at Salinas.

***Enallagma latifolia* (Mill.) Small**

Black-calabash, higuerillo, at Vega Baja.

***Jacaranda acutifolia* H. & B.**

Sharp-leaf jacaranda, flamboyán azul, at Guaynabo.

***Macrocalpa longissima* (Jacq.) Britt.**

Haiti-catalpa, at Mayagüez.

***Podranea ricasoliana* Sprague.**

Ricasoliana, millonaria, at Guayama.

***Spathodea campanulata* Beauv.**

African tulip-tree, tulipán africano, at Dorado.

***Tabebuia argentea* (Bur. & Schum.) Britt.**

Silver trumpet-tree, roble amarillo, at Río Piedras.

T. *glomerata* Urban.

Yellow poui, roble amarillo, at Bayamón.

T. *haemantha* (Bert.) DC.

Roble colorado, at Susúa forest.

T. *heterophylla* (DC.) Britt.

Pink trumpet-tree, roble blanco, at Santurce.

***Tecoma stans* (L.) H.B.K.**

Ginger-thomas, roble amarillo, at Ponce.

ACANTHACEAE

***Asystasia gangetica* T. Anders.**

Creeping thunbergia, at Aguirre.

***Thunbergia erecta* T. Anders.**

Bush clock-vine, angelina, at Río Piedras.

T. *grandiflora* Roxb.

Bengal clock-vine, pompeya, at Guaynabo.

T. *grandiflora* Roxb. 'Alba'.

White clock-vine, at Guaynabo.

RUBIACEAE

***Ixora coccinea* L.**

Burning-love, cruz de Malta, at Río Piedras.

CUCURBITACEAE

***Cucumis sativus* L. 'Ashley'.**

Cucumber, pepinillo, at Río Grande.

Cucurbita moschata (Dutch.) D. & P.

(*Pepo moschata* Britt.), Pumpkin, calabaza, at Guaynabo.

Luffa cylindrica (L.) Roemer

Vegetable sponge, esponja. At Arús.

COMPOSITAE

Helianthus annuus L. "Mammoth Grey Stripe."

Sunflower, girasol, at Vega Alta (23).

Senecio confusus Britt.

Mexican daisy, margarita, at Mayagüez.

Tithonia diversifolia (Hemsl.) Gray

Mexican sun-flower, girasol mexicano, at Aguirre.

NESTING SITES

Plants or plant material observed as nesting sites are as follows: Dead trunks of treefern, *Alsophila* or *Cyathea* spp., at Guaynabo; redwood fencing, *Sequoia semperiferens* Endl., at Aguirre; deadwood of poinsettia, *Euphorbia pulcherrima* Willd., at Ponce; dead trunks of hog-plum, *Spondias mombin* L., at Santurce; dead branches of royal poinciana, *Delonix regia* Raf., at Hato Rey; stumps of logged teak, *Tectona grandis* L.f., at Río Abajo; also in fence posts of bucare, *Erythrina* spp., and West Indian Birch, *Bucera simaruba* (L.) Sarg., at Caonillas and Loíza, respectively.

DISCUSSION

The 285 listed food plant species belonging to 189 genera and 57 families represent a rather wide spectrum of our insular flora. By no means is it considered complete. All of the listed food plant species are dicotyledonous, with exception of one, the male bamboo, *Dendrocalamus strictus* (Roxb.) Nees (14).³ Of these 285 plants, 277 are first reports for Puerto Rico. The fruit or seeds of 25 or more of these reported plants, such as avocado, Barbados cherry, cashew, citron, coconut, cucumber, eggplant, guava, icaco-plum, malay-apple, mamme-apple, mangosteen, okra, passion-fruit, pigeon-pea, pomegranate, pumpkin, rose-apple, sea-grape, snap-bean, sorrel, sunflower, tamarind, tomato, velvet-peach, and West Indian cherry are food sources of man. The possibility should not be overlooked that the female carpenter bee, while collecting nectar and pollen, may inadvertently be directly or indirectly responsible for their pollination.

³ Other Hymenoptera observed feeding on *D. strictus* (Roxb.) Nees were: the honey bee, *Apis mellifera* L., paper-nest wasps, *Polistes americanus* Fab. and *P. major* Palisot de Beauvois.

More than 50 fruit and seed crops of the world depend upon insect pollination for satisfactory yields (8). The ability of the carpenter bee as a pollinator of *Dioscorea* (15), *Lecythis* (5), and *Tephrosia* (1) has been mentioned. *Xylocopidea* other than *X. brasiliatorum* L. are recognized as pollinators in other world areas. Lindsey (8) cites records of *Xylocopa* spp. pollinating jute, *Corchorus capsularis* L. and sunn hemp *Crotalaria juncea* L., in India. In Hawaii (17), a single species is one of the most important pollinators of passion-fruit, *Passiflora edulis* L. and *P. flavacarpa* Degener. Two species in India (6) are pollinators of *Luffa* spp.

X. brasiliatorum L. appears chiefly to utilize a variety of dead, and systematically unrelated plants or plant derivatives for nest construction, with her preferences being for soft to moderately hard woods. Of the eight plants listed as nesting sites, six are trees. The woods of four locally grown species are rated from very soft for ceiba to moderately hard for teak, and with specific gravity ranging from 0.23 for ceiba, to 0.8 for royal poinciana (13).

In general, the carpenter bee's continued nesting in dead branches and stumps of trees is of little or no economic importance. Her value as a pollinator of native and introduced food plants probably offsets the incidental damage caused by her nesting within structural timbers.

RESUMEN

Notas acumuladas durante más de diez años de observaciones indican que el cigarrón utiliza unas 285 especies (una de ellas bambú) de plantas como fuente de alimento. De éstas, 277 se informan por primera vez en Puerto Rico. El cigarrón anida en trece especies, nueve de las cuales se mencionan como tal por primera vez. Estas plantas, en cuyas flores el cigarrón o "carpenter bee", *Xylocopa brasiliatorum* L., encuentra alimento (néctar y polen) y en algunos casos, madera para sus nidos, se han investigado. Se sugiere que el cigarrón inadvertida, directa o indirectamente, es responsable de la polinización de 25 ó más especies de frutas y semillas que constituyen una fuente de alimento para el hombre en Puerto Rico.
