

INDEX OF SUBJECTS¹

- "acerola"
 root development influenced by liming, 69
- acids (See amino acid; lignin.)
- Adjuntas** Region
 banana production, 132
- agar
 selectivity of *Fusarium* culture filtrates in media, 5
- aggregates
 evaluation of factors toward stability in Vertisols, 90
 moisture availability in a typical Ultisol and Oxisol, 112
- "Alonso" soil
 origin of native potassium, 87
- Alphitobius laevigatus*
 insect pest in **Puerto Rico**, 106
- Ametryne
 leaching in soils, 75
 persistence in soils, 76
- amino acid
 content and nutritive value of tuna fishmeals, 148
- amylase
 response in variable illumination studies, 10
- amylose
 content of some starches, 33
- Ancylostoma caninum*
 use of irradiated larvae as a dog vaccine, 54
- Angiostrongylus cantonensis*
 receptiveness to *Pomacea australis*, 53
- ANOPLURA (See cattle tail louse.)
- APHIDIDAE (See aphids.)
- aphids
 additions and corrections to the Aphididae of **Puerto Rico**, 138
Picturaphis, new genus and species for **Puerto Rico**, 145
 vectors of papaya mosaic viruses in **Puerto Rico**, 138
- Applexa marmorata*
 refractiveness to *Fasciola hepatica*, 56
- APT-ase
 variable illumination studies in sugarcane, 10
- arachnids
 two new solpugids from **Puerto Rico**, 108
- Atrazine
 adsorption by soils, 78
 increase of activity by addition of oils and minerals, 18
 leaching in the soil, 75
 persistence in soils, 76
- azauracil
 interrelationships of 6-azauracil in immature sugarcane, 8
- bagasse
ad libitum feeding of complete rations to dairy cows, 120
 beef production based on mixture of concentrates, 119
 comparison with other rations for milk production, 121
 digestibility in studies of rations for dairy cows, 117
- bananas
 effect
 of temperature on plants affected by cucumber mosaic virus, 36
 of zone and climate on Montecristo variety, 130
 production in the south coast of **Puerto Rico**, 131
 in the **Adjuntas** region, 132
 ripening of Montecristo variety, 133
Thielaviopsis rot disease, 22
- barrows
 effect of testosterone propionate, 127
- bean
 development of wound tumors in different varieties and lines, 35
- beef
 production based on mixtures of bagasse and concentrates, 119
 tenderness measurements by the Warner-Bratzler shears, 47

¹ Scientific names are printed in *italics*, common Spanish names in roman type with quotations, names of orders in CAPITALS, names of families in SMALL CAPITALS and locality names in **boldface** type.

- beetles
 Alticids with 128 sperm cells per bundle, 162
- berries
 pneumatic separation of coffee berries, 157
- beta-amylase
 isolation in Napier grass, 17
- beta-hydroxyethyl hydrazine
 comparison with chemicals for flower initiation in pineapple, 142
- bin driers
 use of special flooring, 159
- black plastic
 influence on yield on intensively managed coffee farms, 160
- boars
 effect of estrogen on sexual odor and carcass, 126
- BOH
 effect in pineapple for flower initiation, 142
- bone
 meat meal with bone used for feeding broilers, 105
- borer
 activity period in sugarcane fields in **Puerto Rico**, 59
 comparison of growth and development in **Puerto Rico** and **Louisiana** material, 66
- Brachiaria*
 cytology and taxonomy of two *Brachiarias*, 153
- broilers
 use of coconut meal in broilers and layers, 151
 of different food materials in starting and fattening periods, 105
 of molasses as starting, growing and fattening diet, 149
- brush-cutter
 evaluation of portable equipment in sugarcane fields, 158
- Cactoblastis cactorum*
 geographical distribution and host plants, 61
- cactus moth (See *Cactoblastis cactorum*.)
- Cajanus cajan*
 inheritance of some qualitative characters, 104
 interaction of variety and environment, 1
 of a papaya drink, 122
- Carica candamarcensis*
 resistance to mosaic viruses in **Puerto Rico**, 3
- papaya
 lye-peeling of green fruit, 40
 use of common mosaic virus to demonstrate resistance in *C. candamarcensis*, 3
- cation-exchange
 variability capacity of soils, 91
- cattle tail louse
 distribution and abundance in **Puerto Rico**, 93
- eats
 helminth parasites, 55
- chickens
 mean palatability, 150
- chromium
 role in complete feeding rations for cattle, 25
- citron
 dehydration of fermented fruits, 30
- clay
 relationship to erosiveness of Puerto Rican soils, 88
- climate
 effect
 on sugarcane flowering at **Gurabo**, 49
 on yield, quality and ripening of Montecristo banana, 130
- clones
 evaluation of some processing characteristics of guava, 123
- cobalt
 content in some soils and grasses in **Puerto Rico**, 125
- coconut-meal
 influence on feeding broilers and layers, 150
- coconut-milk
 effect of water quantity in extraction process, 41

- coffee
 effect
 of cultivation on yields, 160
 of leaf loss on yields, 115
 of mulching with grass, pulp and black plastic on yields, 160
 Ethrel as potential coffee ripener, 124
 evaluation of performance of harvesters, 114
 field losses and improved harvesting methods, 144
 influence of varieties and seasons on leaf minerals, 37
 migration of population in coffee regions of **Puerto Rico**, 38
 mineral nutrients of leaves, 37
 new low-cost harvesting method, 161
 pneumatic separation of berries, 159
 use
 of special flooring in bin driers, 159
 of tetrazolium chloride on seed viability, 103
- COLEOPTERA
 two species in pet food in **Puerto Rico**, 107
Alphitobius laevigatus, a pest in **Puerto Rico**, 106
- Colocasia* spp.
Pythium soft rot disease, 21
- concentrates
 ad libitum feeding of complete rations to dairy cattle, 120
 compared with Pangolagrass for milk production, 121
 for
 beef production, 119
 milk production, 24
 Pangolagrass (See *Brachiaria*.)
- copper
 content in some soils and grasses in **Puerto Rico**, 125
- Corynespora*
 leaf spot disease of papaya, 101
- cowpea
 mosaic virus, 111
- cows
 complete rations for dairy cattle, 117
 digestibility of bagasse ration for dairy cows, 117
- CUCULIIDAE
 two coleopterous pests of pet food in **Puerto Rico**, 107
- cucumber
 effect of temperature on various plants affected by mosaic virus, 36
 "currutaca"
 a *Pythium* soft rot of *Xanthosoma* and *Colocasia* spp., 21
- cuttings
 propagation of sapogenin-bearing yams, 94
- cycles
 studies in sugarcane production by monthly intervals, 6
- cytology
 in *Digitaria pentzii*, 140
 in *Digitaria polevansii*, 139
 of two *Brachiarias*, 153
- dairies
 determination of stablefly occurrence on farms, 92
- dairy cows (See cows.)
- dehydration
 of fermented citron, 30
- Desecheo Island**
 flora, 164
- Diatraea saccharalis*
 comparison of growth of larvae from **Puerto Rico** and **Louisiana**, 66
 flight activity periods in **Puerto Rico**, 59
- die-back
 disease of mango, 23
- Digitaria*
 forage yield and character correlations in 30 selections, 150
pentzii: cytological studies, 140
polevansii: cytomorphological and sterility investigations, 138
 tolerance to drought, 109
- Dioscorea*
 effect of herbicides on growth of *D. composita*, 62
 sapogenin-bearing species established from seed, 57
- DIPTERA (See stable fly.)
- Diquat
 effect

- in sucrose decline, 11
 in sugarcane desiccation, 11, 12, 14
- diseases (plant)
- Corynespora* leaf spot of papaya, 101
 - effect
 - of *Fusarium* spp. on germination and stem rot of sugarcane, 84
 - of stunting disease on some sugarcane varieties, 85
 - formation of sexual stage of *Thielaviopsis paradoxa* from sugarcane, 83
 - mango die-back, gummosis and fruit rot, 23
 - mosaic virus
 - of cowpea, 111
 - of sugarcane and their control, 82
 - of *Vigna repens*, 110
 - pepper virus, a new disease in **Puerto Rico**, 4
 - Pythium* soft rot of *Xanthosoma* and *Colocasia*, 21
 - rust of Pangolagrass in **Puerto Rico**, 79
 - Thea sinensis* leaf-spot, 19
 - Thielaviopsis* rot of bananas, 22
- Diuron
- persistence in soils, 76
- dogs
- immunogenic effect of irradiated *Ancylostoma caninum* larvae, 54
- drought
- tolerance of *Digitaria*, 109
- emasculatation
- technique for *Tephrosia vogelii*, 28
- enzymes
- activity as influenced by manganese and silicon, 129
 - behavior in sugarcane, 9
 - Paraquat influence, 11, 14
 - relation to variable light, 10
 - role of light in enzyme changes, 13
- enzymology
- interrelationships in immature sugarcane, 8
 - studies with gibberellic acid on sugarcane, 15
- environment
- influence on pigeonpeas, 1
- erosion
- prediction in Puerto Rican soils, 88
- estrogen
- effect in eliminating sexual odor and on carcass quality of boars, 126
- Ethrel
- potential coffee ripener, 124
- Etiella zinckenella*
- seed infestation and losses in *Tephrosia* seed, 51
- extraction
- procedures for Malathion from fruit pastes, 145
 - for Parathion residues from root crops, 144
- Fasciola hepatica*
- experimental infection
 - of *Lymnaea columella*, 52
 - of *Pomacea australis*, 53
 - refractiveness of *Physa cubensis* and *Applexa marmorata*, 56
- feces
- excretion rates in ruminants, 25
- fishmeal (See tuna fishmeal.)
- flora
- of **Desecheo Island**, 164
- flower
- initiation and tassel emergence
 - in sugarcane, 50
 - in pineapple with BOH, 142
- flowering
- of sugarcane at **Gurabo**, 49
- fertility
- influence on protein and agronomic characteris of pigeonpea grown in an Oxisol, 116
- food
- analysis and vitamin content of canned native Puerto Rican dishes, 26
 - pet food insect pests in **Puerto Rico**, 107
- forage
- yields and plant character correlations
 - in 30 *Digitaria* accessions, 30
- freeze drying
- of sweet peppers, 63
- fruit pastes
- role of extraction procedure for Malathion, 145
- fruit rot
- of mango, 23
- Fusarium*
- selectivity of culture filtrates in agar media, 5

- effect on germination and stem rot of
of sugarcane, 84
- fusel oil
colorimetric analysis in rums, 128
- gamma
irradiation on lemon oil and lemon-
grass oil, 163
radiation
effects on pineapple plants, 71
influence on storage life of papayas, 72
- gibberellic acid
activity functions in sugarcane, 16
enzyme-silicon studies in sugarcane, 15
relationship to water and phosphorus, 9
variable illumination studies, 10
- grass
character correlations and yields of 30
Digitaria selections, 154
cobalt and copper content in **Puerto
Rico**, 125
cytology and taxonomy of two *Brachi-
arias*, 153
isolation of beta-amylase in Napier, 17
rations in milk production, 48
rust of Pangolagrass in **Puerto Rico**, 79
use as mulch in coffee cultivation, 160
yield comparison and correlations in 16
Panicum accessions, 152
- growth regulators
effect on rotenone content of *Tephrosia
vogelii*, 65
- guava
effect of heat on frozen nectar, 134
evaluation of processing characteristics
in cultivated guava clones, 123
- gummosis
of mangoes, 23
- HAEMATOPINIDAE (See cattle tail louse.)
Haematopinus quadripertusus
distribution and abundance in **Puerto
Rico**, 93
- harvesters
evaluation and performance for coffee,
114
- heat
effect on quality and shelf life of frozen
guava nectar, 134
- Helminthosporium*
new species causing leaf spot disease of
sugarcane, 81
- helminths
as cat parasites, 55
- hens
influence of coconut meal in layer and
broiler diets, 151
utilization of molasses in layer and
broiler diets, 149
- herbicides
adsorption of Atrazine and Terbacil by
soils, 78
Atrazine investigations, 18
effect on growth of *Dioscorea composita*,
62
evaluation on foliage of four tropical
woody species, 58
determination of soil adsorptivities in
urea herbicides, 143
persistence in a soil cropped to sugarcane,
77
of Atrazine, Ametryne, Prometryne and
Diuron in soils, 76
- HOMOPTERA (See *Picturaphis*.)
- host plants
of *Cactoblastis* in **Puerto Rico** and **U. S.
Virgin Islands**, 61
records for two species of *Nasutitermes*,
96
- immunology
of dogs treated with irradiated *An-
cylostoma* larvae, 64
- Indexes to Journal of Agriculture of the
University of Puerto Rico
Volumes 1-47 (1917-1963), 97
48-52 (1964-1968), 95
53-55 (1969-1971), 100
- industry
sugarcane supply and demand in **Puerto
Rico**, 39
- insecticides (See Malathion, Parathion.)
- insects
Alphitobius laevigatus, an insect pest in
Puerto Rico, 106
Altitudinal beetles with 128 sperm cells per
bundle, 162
Aphididae of **Puerto Rico**, additions and
corrections, 147
determination of stable fly occurrence on
dairy farms, 92
Etiella zinckenella injury to *Tephrosia*, 51
new locality and host plant records for
two species of *Nasutitermes*, 93

- Picturaphis*, new **Puerto Rico** genus and species, 146
- thrips from **Vieques Island**, 99
- whitefly transmission of viruses in **Puerto Rico**, 34
- invertase
- studies of yeast and sugarcane invertase, 7
 - variable illumination studies, 11
- irradiation
- effect on lemon and lemon-grass oils, 163
 - 40 Kr. X-irradiated *Ancylostoma* larvae used as a vaccine in dogs, 54
- irrigation
- psychrometric approach, 43
- ISOPTERA (See *Nasutitermes* spp.)
- labor
- supply and demand in Puerto Rican sugarcane industry, 39
- Lajas Valley**
- sulphur transformation in sodic saline soils, 113
- lamps, heat
- use in farrowing pens, 46
- leaf
- composition as index of available soil nutrients, 44
 - effect of loss on coffee yields, 115
 - influence of varieties and seasons on mineral nutrients in coffee, 37
 - presence of phosphoriboisomerase in sugarcane, 73
- leaf-spot disease
- in papaya, 101
 - in sugarcane, 81
 - in *Thea sinensis*, 19
- lemon-grass
- effect of gamma irradiation on oils, 163
- lemon oil
- effect of gamma irradiation, 163
- life history
- of *Lymnaea columella*, 52
- light
- relationship to enzyme and sucrose changes, 13
 - response of sugarcane enzymes to variable light, 10
- lignin
- use of acid detergent lignin in complete cattle feeding rations, 25
- lima-bean
- pod borer infestation in *Tephrosia* seed, 51
- lime
- effect on root development of acerola trees, 69
- lye
- role in peeling green papayas, 40
- Lymnaea columella*
- life history and experimental infection with *Fasciola*, 52
- magnesium
- effect on plantains, 68
 - evidence of requirement by pineapple in Oxisols, 67
- manganese
- influence on sugarcane, 129
- Mangifera indica* (See mango.)
- mango
- diseases of fruit, 23
 - gummosis, die-back and fruit rot diseases, 23
 - market potential for improved varieties, 98
 - Provitamin A and Vitamin C content, 70
 - pulp extraction method, 31
- Malathion
- extraction procedure for fruit paste determinations, 145
- meat
- palatability studies in chickens fed different diets, 150
- meat meal
- as feed for broilers, 105
 - influence on chicken meat palatability, 150
- media
- agar in *Fusarium* culture, 5
- migration
- status in coffee region populations of **Puerto Rico**, 38
- milk (see coconut milk)
- comparison of rations for production result, 120
 - effect of crude-protein concentrates in production, 24
 - production
 - by all-grass ration, 48
 - by Pangolagrass and concentrates, 121
- minerals
- influence of mineral oils on Atrazine, 18

- nutrient levels of coffee leaves in **Puerto Rico**, 37
- qualitative analysis on Alonso soil, 86
- minor elements
effect on plantains, 68
- moisture
availability in soil aggregates, 112
- molasses
utilization by laying and broiler chickens, 149
- Montecristo banana
effect of zone and climate on yields, quality and ripening, 130
production
in the south coast of **Puerto Rico**, 131
in the **Adjuntas** region, 132
ripening, 133
- monthly cycles
relationship to sugarcane production in **Puerto Rico**, 6
- mosaic virus
aphids as vectors in papaya diseases, 138
effect of temperature
on infected sugarcane, 80
on various plants affected by cucumber mosaic virus, 80
of *Vigna repens* in **Puerto Rico**, 110
resistance of *Carica candamarcensis*, 3
- moth borer
comparison of growth and development of larvae, 66
- mulch
effect on coffee yields, 160
- MUSCIDAE (See stable fly.)
- Napier grass
isolation of beta-amylase, 17
- Nasutitermes* spp.
new locality and host plant records for two species, 96
- nematodes
biological studies on stubby-root species, 27
- Nectar (See guava.)
- nitrate
interrelationships in immature cane, 8
variable illumination studies, 10
- nutrient elements
effect on growth, development and yields of plantains, 68
relation of leaf composition to available soil nutrients, 44
- nutrition
influence of manganese and silicon on immature sugarcane, 129
value of tuna fishmeal in feed, 148
- oils (see vegetable oil)
addition of mineral and vegetable oils to Atrazine, 18
effect of irradiation in lemon and lemon-grass, 163
- o-nitrobenzaldehyde
as color reagent in fusel oil determinations in rum, 128
- organic-matter
influence on the variability in cation-exchange capacity of soils, 91
- Oxisol
factors affecting growth of pigeonpea, 116
moisture availability in aggregates, 112
need of magnesium by pineapple, 67
- palatability
studies on chicken meat, 150
- Pangolagrass
in diets for milk production, 121
occurrence of rust in **Puerto Rico**, 79
- Panicum*
comparisons and correlations of 16 accessions, 152
- papaya
gamma radiation extension of storage life, 72
leaf spot disease, 101
lye-peeling of green fruit, 40
mosaic viruses in **Puerto Rico**, 3
preparation and canning of a drink, 122
- Paraquat
in enzyme studies of sucrose decline, 11, 14
relationship of light to enzyme and sucrose changes, 13
role in sugarcane desiccation, 12, 14
- parasites
of cats, 55
- Parathion
extraction procedures for determination in root crops, 144
- pastures
milk production by cows on all-grass rations under tropical conditions, 48
- peppers
a new virus disease in **Puerto Rico**, 4

- pet food
 insect pests in **Puerto Rico**, 107
- Phaseolus vulgaris*
 development of wound tunors in common bean varieties and lines, 35
- phosphoriboisomerase
 in sugarcane leaves, 73
- phosphorus
 relationship with gibberellic acid and water in sugarcane, 9
- Physa cubensis*
 refractiveness to *Fasciola*, 56
- Physoptera rhodina*
 mango diseases, 23
- Phytophthora cinnamomi*
 induction of sexual reproduction, 20
- Picturaphis*
 new genus and species described from **Puerto Rico**, 146
- pigeonpea
 factors influencing cultivation in an Oxisol, 116
 inheritance of some quantitative characters, 104
 interaction of variety and environment, 1
- pigs (See barrows)
 optimum weight for maximum profit, 45
 use of heat lamps in farrowing pens, 46
- pineapple
 effect of gamma radiation on plant, 71
 magnesium requirement in Oxisols, 67
 two new varieties for **Puerto Rico**, 118
 use of BOH for flower initiation, 142
- plant diseases (See diseases.)
- plant propagation
 techniques and problems in yam stem cuttings, 94
- plantains
 effect of minor elements and magnesium, 68
 of time of planting on yields and processing, 136
 relation to temperature on plants affected by the cucumber mosaic virus, 36
 ripening under controlled conditions, 135
 stability of fried chips, 64
- plastic
 effect of black type on coffee yields, 160
- pod-borer
 damages caused to infested *Tephrosia* seed, 51
- pollination
 cross-pollination techniques for *Tephrosia vogelii*, 28
- Pomacea australis*
 Experimental infection with *Fasciola hepatica*, 53
- potassium
 origin in Alonso soil, 87
- Prometryne
 leaching in soils, 75
 persistence in soils, 76
- protein
 content in tuna fishmeals, 148
 effect on milk production by concentrate mixes, 24
- Provitamin A
 content in mango varieties grown in **Puerto Rico**, 70
- Puerto Rican canned native foods
 analysis and vitamin content, 26
- pulp
 method for extraction in mango, 31
 for extraction in soursop, 32
 effect on coffee yields by coffee pulp mulch, 160
- puree
 of frozen soursop, 137
- radiation
 estimation of solar intensity from meteorological data, 42
- rations
ad libitum feeding of complete mixtures to dairy cows, 120
 effect of all-grass diets on milk production, 48
 digestibility of bagasse by dairy cows, 117
 of concentrates, sugarcane bagasse and Pangolagrass, 121
- regulators (See growth regulators.)
- ribose-5-phosphate
 investigations in sugarcane, 74
- ripening
 effect of zone and climate on Montecristo bananas, 130
 of Montecristo variety, 133

- of plantains under controlled conditions, 135
- rot (See fruit rot, soft rot.)
- Thielaviopsis* disease of bananas, 22
- root
- development in acerola trees by liming, 69
 - formation in pineapple affected by gamma radiation, 71
- rotenone
- content in *Tephrosia vogelii* leaves, 65
 - production in *Tephrosia* influenced by planting date and spacing, 60
- rum
- fusel oil determination by colorimetric analysis, 128
- rust
- of Pangolagrass in **Puerto Rico**, 79
- saline sodic soil
- sulfur transformation, 113
- sapogenin
- establishment of *Dioscorea* from seed, 57
 - propagation of yams from cuttings, 94
- seasons
- influence on mineral nutrient levels in coffee leaves, 37
- seed
- in establishing sapogenin-bearing *Dioscorea*, 57
 - infestation by pod-borer on *Tephrosia*, 51
 - Tephrosia vogelii* production potential in **Puerto Rico**, 29
 - viability tests using tetrazolium chloride, 103
- sexual odor
- effect of estrogen on elimination in boars, 126
- shears
- Warner-Bratzler model to indicate beef tenderness, 47
- silicon
- enzyme studies of gibberellic acid, 15
 - influence on sugarcane, 129
 - use in preservation of sucrose, 12
- silt
- influence on soil erosiveness, 88
- 6-azauracil
- interrelationships with nitrate in immature sugarcane, 8
- snails
- Angiostrongylus cantonensis* receptiveness to *Fasciola*, 53
 - Applexa marmorata* refractiveness to *Fasciola*, 56
 - experimental infection
 - of *Lymnaea columella*, 52
 - of *Pomacea australis*, 53
 - Physa cubensis* refractiveness to *Fasciola*, 56
 - Pomacea australis* receptiveness to *Angiostrongylus*, 53
- sodic soil (See saline sodic soil.)
- soils
- adsorption of Atrazine and Terbacil, 78
 - adsorptivities analyzed in urea herbicides, 143
 - aggregates in Vertisols, 90
 - cobalt and copper content in **Puerto Rico**, 125
 - erosion prediction in **Puerto Rico**, 88
 - evaluation of factors on stability of aggregates, 90
 - leaching of Atrazine, Ametryne and Prometryne, 75
 - leaf composition as index of available nutrients, 44
 - moisture availability in aggregates, 112
 - origin of native potassium in Alonso type, 87
 - persistence of herbicides, 76, 77
 - qualitative mineral analysis on Alonso type, 86
 - rate of water intake in tropical soils, 79
 - sulfur transformation in a saline sodic type, 113
 - variability in cation-exchange capacity, 91
- soft rot
- of *Xanthosoma* and *Colocasia* spp., 21
- solar radiation
- estimation of intensity from meteorological data, 42
- solpugids
- two new species from **Puerto Rico**, 108
- sorghum
- weed control in **Puerto Rico**, 102
- soursop

- pulp extraction procedure, 32
 puree investigations, 137
- soybean
 meal in combination with other nutrient materials for feeding broilers, 105
- sperm cells
 in Alticid beetles, 162
- stable fly
 determination of occurrence on dairy farms, 92
- starches
 extraction, purification and amylose content, 33
- stem rot
 effect of *Fusarium* spp. in sugarcane, 84
- sterility
 in *Digitaria polevansii*, 139
- Stomoxys calcitrans*
 determination of occurrence on dairy farms, 92
- stubby root nematodes
 biological studies, 27
- stunting disease
 effect on sugarcane yields, 85
- sucrose
 enzyme studies in relation to decline, 11, 14
 interrelationships to production in immature sugarcane, 8
 relationships of light in transformation, 13
 use of silicon in preservation in sugarcane, 12
- sugar
 influence of manganese and silicon in production in immature cane, 129
- sugarbeet
 production in **Puerto Rico**, 155
- sugarcane
 analysis of labor supply and demand in industry, 39
 bagasse as ration in milk production, 121
 diseases and their control in **Puerto Rico**, 82
 effect
 of *Fusarium* spp. on germination and stem rot, 84
 of stunting disease on yields, 85
 enzymes, 7, 8, 9, 1, 11, 13, 14, 15, 129
- evaluation of portable brush-cutter for harvesting, 158
- factors affecting nutrition, 129
- flight activity of moth-borer in fields, 59
- flower initiation and tassel emergence, 50
- flowering affected by certain climatic factors, 49
- gibberellic acid relationships, 9, 15, 16
- immature stalks affected by chemical interrelationships, 8
- influence of manganese and silicon, 129
- interrelationships of nitrate and 6-azauracil, 8
- in vitro* formation of the sexual stage of *Thielaviopsis paradoxa*, 83
- labor supply and demand in industry, 39
- leaf spot disease caused by *Helminthosporium*, 81
- molasses in diets for broilers and layers, 149
- moth-borer flight activity periods in fields, 59
- persistence of various herbicides in soil, 77
- phosphoriboisomerase in foliage, 73
- production by monthly cycles in **Puerto Rico**, 6
- relationships of light to enzyme and sucrose changes, 13
- ribose-5-phosphate studies, 74
- silicon investigations, 15
- yeast and invertase studies, 7
- sulphur
 transformation in saline sodic soils, 113
- sweet peppers
 freeze-drying, 63
- Tannergrass (See *Brachiaria*.)
- tassel
 emergence in sugarcane, 50
- taxonomy
 description
 of a new genus and species of aphid from **Puerto Rico**, 145
 of two *Brachiaria* spp., 153
- tea (See *Thea sinensis*.)
- temperature
 effect
 on sugarcane infected with mosaic virus strain, 80

- on symptom expression by different plants affected by cucumber mosaic virus, 36
 - on water during extraction of coconut milk, 41
- TENEBRIONIDAE
- two coleopterous pests of pet foods in **Puerto Rico**, 107
- Tephrosia vogelii*
- damage to seed caused by lima-bean pod borer, 51
 - effect of planting dates and spacing on rotenoid production, 60
 - emasculation and cross-pollination techniques, 28
 - rotenone content of leaves, 65
 - seed production potential in **Puerto Rico**, 65
- Terbacil
- adsorption by soils, 78
- testosterone propionate
- effect on fattening barrows, 127
- tetrazolium chloride
- role in testing coffee seed viability, 103
- Thea sinensis*
- leaf-spot disease, 19
- Thielaviopsis paradoxa*
- formation of sexual stage from sugarcane, 83
 - rot disease of bananas, 22
- thrips
- from **Vieques Island**, 99
- Thunnus* sp. (See tuna fishmeals.)
- THYSANOPTERA (See thrips.)
- tumors
- development in wounds on bean plant, 35
- tuna fishmeal
- role as feed for broilers, 105
- urea herbicides
- determination of soil adsorptivities, 143
- Ultisol
- moisture availability in aggregates, 112
- vaccine
- X-irradiated *Ancylostoma* larvae in dogs, 54
- varietal differences
- in development of wound tumors in different bean lines, 35
 - in influence upon mineral nutrient levels of coffee, 37
 - in interaction with environment in pigeonpea, 1
 - in new pineapples of **Puerto Rico**, 118
 - in *Xanthosoma* yield trials, 2
- vectors
- aphid transmission of papaya mosaic, 138
 - white fly transmission of plant viruses in **Puerto Rico**, 34
- vegetable oils
- role in Atrazine activity, 18
- Vertisols
- evaluation of influence on stability of aggregates, 90
- Vieques Island**
- thrips, 99
- Vigna repens*
- mosaic in **Puerto Rico**, 110
- Virgin Islands**
- Cactoblastis* distribution and host plants, 61
 - virus (See mosaic virus)
 - aphids as vectors, 138
 - effect of temperature on cucumber mosaic, 36
 - of cowpea, 111
 - papaya, 3
 - peppers, a new disease in **Puerto Rico**, 4
 - resistance of *Carica candamarcensis*, 3
 - transmission by insect vectors, 34, 138
 - whitefly-transmitted in **Puerto Rico**, 34
- Vitamin
- C, content in several varieties of mangoes in **Puerto Rico**, 70
 - content of canned native Puerto Rican dishes, 26
- Warner-Bratzler shears
- role in determining beef tenderness, 47
- water
- effect of amount in extraction of coconut milk, 41
 - intake in tropical soils, 89
 - relationship to gibberellic acid and phosphorus in sugarcane, 9
- weed
- control in sorghum in **Puerto Rico**, 102
- weed-killers (See herbicides)
- whitefly
- transmission of plant viruses in **Puerto Rico**, 34

- wound tumors
development in different bean lines and
varieties, 35
- Xanthosoma*
Pythium soft rot disease, 21
variety yield trials, 2
- X-ray
vaccination of dogs with irradiated
Ancylostoma larvae, 54
- yams
sapogenin-bearing, propagation by cut-
tings, 94
- yeast
comparative studies with sugarcane
invertase, 7
