

**LEPTOPHARSA CONSTRICTA (CHAMPION) A NEW
LACEWING BUG (TINGIDAE:HEMIPTERA)
FOR PUERTO RICO**

A new lacewing bug not previously reported from Puerto Rico was discovered by the author during a visit to Cambalache Forest near Arecibo, P.R., in August 1961. Specimens of this lacewing bug were collected on the leaves of the leguminous vine, *Dolichos minimus* (L.) Medic. Intense chlorotic and yellowish areas were noted on the leaves of the vine infested
