

THE JOURNAL OF AGRICULTURE OF THE UNIVERSITY OF PUERTO RICO

Issued quarterly by the Agricultural Experiment Station of the University of Puerto Rico, Mayagüez Campus, for the publication of articles and research notes by staff members or others, dealing with scientific agriculture in Puerto Rico and elsewhere in the Caribbean Basin and Latin America.

Vol. LXIX

OCTOBER 1985

No. 4

INDEX TO THE JOURNAL OF AGRICULTURE OF THE UNIVERSITY OF PUERTO RICO, VOLUMES 56-69 (1972-1985)

SUPPLEMENT NO. 3¹

Samuel O. Vélez-Delgado, Margaret Inserni, Rosaura Rivera-Ostolaza²

AUTHORS³

Abrams, R.

*1973, Effect of planting time, plant population and row spacing on yield and other characteristics of pigeon peas, *Cajanus cajan* (L.) Millsp., 57(4), 275.

*1974, Effect of mechanical, cultural and chemical weed control on yield and yield components of pigeon peas, *Cajanus cajan* (L.) Millsp., 58(4), 466.

*1975, Effect of fertilizer N, P, K, Ca,

* Senior author.

¹ In the July 1971 issue of the *Journal of Agriculture of the University of Puerto Rico* appeared the first two installments of the author and subject indexes to the journal. The first installment comprises volumes 1 through 47, the years 1917 to 1963. That installment was compiled by Luis F. Martorell, Silverio Medina-Gaud and Enrique Jordán-Musa. It includes 1,264 titles, both full articles and research notes. The second installment, Supplement No. 1, compiled by Luis F. Martorell, comprises volumes 48 through 52, years 1964 to 1968. It includes 191 articles and research notes.

The third installment, Supplement No. 2, compiled by Silverio Medina-Gaud and Luis F. Martorell, appeared in the October 1971 issue. It comprises volumes 53 through 55, years 1969 to 1971, and includes 164 articles and research notes.

The present installment, Supplement No. 3, brings the indexes up to the current issue. It comprises volumes 56 through 69, years 1972 to 1985. It includes 759 articles and research notes.

It is the compilers' intention, once they have updated the indexes, to keep them current by publishing annual indexes in the October issue (fourth number) of every volume.

Unlike the first three installments, the present index is self-referenced. It provides a full reference for each author, regardless of senior or junior status. Senior authors are identified with an asterisk (*) and sole authors by a dagger (†). In the subject section, it also provides full reference with each subject without first referring the reader to the author index.

The compilers express their gratitude to Ms. Joan Hayes, Station librarian, who, besides stressing the need for the indexes, gave us valuable suggestions and support and agreed to revise the manuscript. We also thank doctor Silverio Medina-Gaud, who also revised the manuscript and gave very valuable suggestions.

² Associate technical editor, English language consultant, and Administrative Typist III, respectively, Publications section, Agricultural Experiment Station, Río Piedras, P.R.

³ An author's name may appear in more than one form. Although all first names are abbreviated, an author may appear with one or two initials. Last names may appear single

- Mg and Si on tomato yields in an Oxisol, 59(1), 26.
- 1977, Effect of foliar-applied fertilizers on pigeon peas (*Cajanus cajan*), 61(2), 217.
- *1979, Effects of date of planting and planting systems on tomato yield in the Isabela area, 63(1), 57.
- 1979, Effect of delayed harvest and fungicide sprays on pigeon pea seed quality in Puerto Rico, 63(4), 428.
- 1981, High yields of non-fertilized protein-rich pigeon peas on tropical soils of low inherent fertility in Puerto Rico: An explanation of a paradox, 65(1), 21.
- 1981, Performance of eight cowpea (*Vigna unguiculata*) cultivars on an Oxisol in northwestern Puerto Rico, 65(1), 62.
- Abreu, E.
- 1983, Speculations about phoresy by a deutonymph (Acarina) on *Atractocerus brasiliensis* (Coleoptera: Lymexylonidae), 67(4), 514 (RN).
- 1984, Chemical control of nematodes and insects in tomato, 68(1), 79.
- *1984, Notes on the ectoparasites of the cattle egret in Puerto Rico, 68(1), 113 (RN).
- *1984, New records of insects and mites for Puerto Rico, 68(1), 115 (RN).
- *1985, Occurrence of pepper weevil, *Anthonomus eugenii* Cano (Coleoptera: Curculionidae), in Puerto Rico, 69(2), 223 (RN).
- Abreu-Rodriguez, E.
- †1982, *Adactylidium* sp. (Acarina: Pyemotidae), a new record of a predatory mite of thrips eggs in Puerto Rico, 66(4), 310 (RN).
- *1983, Oviposition preference of *Dia-prepes abbreviatus* (Coleoptera: Curculionidae) on various ornamental foliage plants, 67(2), 117.
- Abruña, F.
- 1972, Effect of four levels of concentrate feeding on milk production by Holstein cows grazing intensively managed tropical grass pastures, 56(2), 97.
- 1972, Comparison of heavily fertilized pangola and star grass pastures in terms of beef production and carrying capacity in the humid mountain region of Puerto Rico, 56(2), 104.
- 1972, Effects of two heights and three intervals of grazing on the productivity of a heavily fertilized pangola grass pasture, 56(2), 110.
- 1972, Effect of four levels of fertilization of beef production and carrying capacity of pangola grass pastures in the humid mountain region of Puerto Rico, 56(3), 219.
- 1972, Effect of nitrogen rates, harvest interval and cutting heights on yield and composition of star grass in Puerto Rico, 56(3), 267.
- 1972, Effect of two cutting heights, four harvest intervals and five nitrogen rates on yield and composition of Congo grass under humid tropical conditions, 56(3), 280.
- 1972, Effect of season and plant spacing on yields of intensively managed soybeans under tropical conditions, 56(4), 365.
- 1972, Effect of five nitrogen sources applied at four rates to pangola grass sod under humid tropical conditions, 56(4), 410.
- *1974, Effect of season of the year on yields of 13 varieties of rice growing in the humid region of Puerto Rico, 58(1), 11.
- *1974, Response of green beans to acidity factors in six tropical soils, 58(1), 44.

RN Research note

or compound. When compound, they are hyphenated regardless of how they appear in the original.

Alphabetically, names with a single initial precede two-initial ones (Y. Badillo precedes Y. A. Badillo); single names precede hyphenated ones (Abreu, Z. precedes Abreu-Abadia, A.)

Articles under one name are organized chronologically (Those in volume I precede those in volume II; those in number 1 precede those in number 2 and those on page 1 precede those on page 2).
